

BARDAHL

EXTRAORDINARY PRODUCTS.
EXTENSIVE AUTOMOTIVE CARE.

Here's what you get to keep your vehicle fighting fit in the long run.

- Formula Racing tested & proven effective products
- Enhances performance and engine life
- Reduced harmful emissions
- New vehicle remains new
- Extends life of your old vehicle

NO OIL RUN

A MARVEL

BARDAHL has conducted several 'No Oil Run' events to demonstrate the superiority of Bardahl products. Wherein the car is first treated with Bardahl engine oil treatment and then every drop of engine oil is drained out. The car is then run through normal traffic and long highway stretches without any engine oil. The car's performance was found completely normal and no engine seizures took place. Thanks to Bardahl products.

Such "No Oil Runs" are conducted world over. In Malaysia a vehicle was run without engine oil for a record 1300 kms and in Italy a Volvo truck was run for 200 kms without engine oil. All these 'No Oil Run' events were certified by recognised bodies and respected individuals from the automotive trade.

HIGH PERFORMANCE AUTOMOTIVE CARE

*Cleans, Maintains, **Performs***

Established in 1939 at Seattle (USA), Bardahl rapidly made its presence in automotive care, worldwide. Today, Bardahl continues to introduce consistent quality products for specialised car functions, including formula racing.

BARDAHL

THE ASSURANCE OF HIGH PERFORMANCE

You love your vehicle which is an investment for you but contrary to popular belief, research has found that your vehicle does not survive only on good fuels and oils. Your vehicle needs proven products to clean fuel and engine deposits to maintain peak power, performance and economy in the long run. Not without reasons, many OEMs in India recommend select Bardahl products, which are race tested and proven effective under extreme conditions, the world over.

BARDAHL

THE UNIQUE POLAR ATTRACTION FORMULA

Bardahl contains a unique "Polar Attraction Formula" which provides two distinct types of molecular protective films on metal surface, to reduce engine wear & tear and friction. Along with controlling harmful deposits & emissions, Bardahl auto maintenance treatments help you maintain engine power, performance and optimum fuel economy.

FUEL TREATMENTS

INJECTOR KLENE

CLEANS AND UNCLOGS FUEL SYSTEM OF PETROL ENGINES

- Cleans and unclogs fuel injectors • Dissolves injector deposits
- Protects the injector nozzles and other fuel system parts from excessive corrosion • Facilitates easier starting, smoother riding, immediate throttle response • Improves fuel economy • Reduces stumbling and knocking at highway speeds • Does not harm catalytic converters • Suitable for both leaded and unleaded petrol

DIESEL INJECTOR CLEANER

CLEANS FUEL SYSTEM OF DIESEL ENGINES

- Improves operating efficiency • It improves diesel fuel ignition and combustion properties • Cleans and maintains fuel system • Significant reduction in emission • Increases cetane number and helps reduce engine start-up time and combustion chamber deposits • Improves fuel stability, preventing oxidation & resisting deposit formation • Lubricates fuel pump and increases its life • Protects injector, fuel pump and other parts of fuel system from corrosion

CARB & CHOKE CLEANER

THROTTLE BODY CLEANER

- Removes varnish, dirt and other deposits • Helps restore pep and power of the engine • Improves fuel economy • Improves engine efficiency

ENGINE & TRANSMISSION OIL TREATMENTS

OIL SUPPLEMENT

REDUCES ENGINE WEAR AND TEAR

- Contains the unique "Polar Attraction" formula which coats moving engine parts with special friction reducing molecular film • Maintains new car performance • Increases fuel efficiency • Reduces start-up wear • Increases engine horsepower output and performance • Prevents sludge, gum and varnish formation on valves, lifters and other engine surfaces

OIL TREATMENT

MAKES THE OLD ENGINE AS GOOD AS NEW

- Contains the unique "Polar Attraction" formula which coats moving engine parts with a special friction reducing molecular film and viscosity index improver • Increases fuel economy • Restores lost compression and power • Reduces oil burning, exhaust smoke and blow-by • Reduces engine wear, especially start-up wear and increases engine life • Reduces clattering noise in engine • Prevents sludge, gum and varnish formation on valves, lifters and other critical engine surfaces

SPECIAL DUTY

IMPROVES COMPRESSION & POWER OF ENGINES (ENGINE TREATMENT & POWER BOOSTER)

- Contains the unique "Polar Attraction" formula which coats moving engine parts with a special friction reducing molecular film and viscosity index improver • Increases fuel economy • Reduces start-up wear • Increases engine life, especially under severe service conditions, heavy-duty operations, truck and trailer use and other petrol & diesel engine applications • Reduces emissions and oil consumption • Improves compression, power & performance of older engines • Prevents sludge, gum and varnish formation on engine parts

ENGINE FLUSH

CLEANS UP ENGINE WHILE DRIVING
(USE BEFORE OIL CHANGE)

- Cleans up existing engine deposits • Prevents further deposits • Frees sticky lifters and rings • Chemically "tunes" the engine during driving • Restores pep and power • Removes sludge from valve train

CONCENTRATED GEAR OIL ADDITIVE

SMOOTHENS GEAR OPERATIONS

- Promotes fuel economy • Improves overall engine operation • Polar Attraction formula reduces deposits formation and gear friction • Improves higher load operations • Improves fuel economy and reduces friction and wear • Reduces differential howl and transmission noise • Ensures easier shifting

RADIATOR TREATMENTS

RADIATOR FAST FLUSH

CLEANS THE RADIATOR

- Removes harmful deposits on the radiator tubes that result from oxidations of coolant & corrosion of metal • Removes contaminants such as dirt, grease, oil or hard water deposits (scales) • Improves efficiency of heat transfer from engine to radiator • Eliminates pre-ignition problems, engine oil degradation, thermal distortion of engine components

RADIATOR CONDITIONER

KEEPS THE ENGINE COOLER

- Prevents rust, scaling and corrosion in radiator • Restores proper heat transfer needed for efficient engine performance • Helps efficient fuel use and keeps distortion, condensation and rocker arms sludge to minimum • Lubricates water pump and ensures noiseless operations

FUEL SYSTEM MAINTENANCE SOLUTIONS

POWERTUNE PETROL DECARB

- Comprehensive clean-up of combustion chamber, induction system & fuel injector deposits • Improved fuel economy • Improved engine performance & response • Reduced emissions.

DIESELTUNE DIESEL DECARB

- Better fuel economy • Better combustion & increased power • Faster starting & warm-up • Reduced injector & pump wear • Reduced emissions • Savings in maintenance costs

EGR CLEANER

- Immediately helps restore fuel economy • Improves power and overall drivability • Effectively eliminates the most stubborn of all engine deposits • One of the most powerful cleaners in its class • Helps reduce harmful emissions and poor throttle response • Cleans the most difficult and most neglected portion of the fuel system • Prolongs the life of the EGR valve

DPF CLEANER

- Ensures complete and rapid Diesel Particulate Filter (DPF) regeneration • Extends life span of the DPF avoiding expensive replacement • Prevents increase in oil consumption and loss of power caused by clogged DPF • Most economical product to reduce soot without any modifications to the fuel system

AIR INTAKE SYSTEM KLENE

- Powerful solvent cleaning system • Cleans throttle body, idle passages, and intake plenum • Loosens the throttle plate to restore efficient operation • Removes deposits from the idle passages to improve drivability • Safe for throttle body, catalytic converter and O2 sensors
