

AIR INTAKE

CARB & CHOKE
CLEANER

Stalling & rough idling is often caused by a build-up of deposits of airborne contaminants, oil and combustion gases in the throttle body / air intake system.

- Cleans throttle body, idle passages and intake plenum
- Removes deposits from the idle passages to improve drivability
- Increased acceleration, fuel economy & overall performance

EGR VALVE

CLEANING

Carbon deposits build-up and cause improper EGR valve operation, blockages in the EGR cooler and catalyst. These deposits cause drivability problem and reduce power, performance & fuel economy.

- Efficiently removes soot and carbon from diesel exhaust gas recirculation (egr) engines and immediately helps restore fuel economy
- Improves power and overall drivability
- Removes blockages in EGR and exhaust systems
- Loosens sticking variable vane turbochargers
- Helps reduce harmful emissions and poor throttle response
- Cleans the most difficult and most neglected portion of the fuel system
- Prolongs the life of the EGR valve
- One of the most powerful cleaners in its class

RODENT

REPELLANT

This treatment is ideal to prevent engine wiring and other electrical connections from rat bites.

- Safe and easy to use rodent repellent treatment which drives away rats without killing them
- Protects the car wiring from rat menace under the bonnet of the car
- Non Poisonous

SERVICE PRO

CAR LUBE PACKAGE

A set of lubrication and cleaning treatments using Lubrication Spray, Window Dresser, Electrical Contact Cleaner and Battery Terminal Shield.

- Maintains and lubricates hinges of door, bonnet and seat adjustment channels
- Dresses and lubricates window rubber channels
- Protects & cleans vital electrical contacts and battery terminals

CAR CARE

BEYOND COMPARE

ELVI Bardahl together with Hyundai brings you the car care range of services. These services are designed to protect the exterior as well as interior of your valued asset. We have after exhaustive research developed products to protect your vehicle from rust, corrosion, paint fading, stains, etc. It's essential that your Hyundai car undergoes such treatments periodically as it is exposed to harsh conditions everyday. So, go ahead and enjoy the ultimate experience in your vehicle.

PAINT CARE

SYSTEM

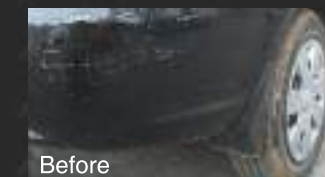

EXTERIOR BEAUTIFICATION
PAINT PROTECTION-UV

Paint Care System is a unique paint care maintenance formula. The process starts with cleaning the car, waxing the painted surface, removal/fading of scratches, swirl and oxidation marks. This is followed by removing fine scratches and using sealant for giving premium glossy look and protection to the vehicle. Finally the tyre and vinyl surfaces are cleaned and polished.

ADVANTAGE

PAINT CARE SYSTEM

Before

After

- Cleans oxidation and deep stains
- Removes scratches and swirl marks giving your paint a swirl free finish
- Removes light surface imperfection
- Protects the vehicle finish from sun, salt grease, tar, acid rain etc.
- Provides long lasting and high gloss durable shine to your vehicle's exterior paint

SPECIALLY FOR
YOUR **HYUNDAI**

EXTERIOR BEAUTIFICATION OF EXTERIOR SURFACES

Paint care system comes along with enrichment of exterior parts like vinyl, tyre, glass and plastic areas, which are also cleaned to perfection from dirt, stains, dust and polished to give the vehicle finishing touches.

UPHOLSTERY CLEANING PROGRAM

INTERIOR ENRICHMENT
PREMIUM INTERIOR-FOAM BASED

Car interiors are first dry vacuumed and cleaned. Process involves cleaning the car Upholstery along with plastic/vinyl surfaces using concentrated Upholstery cleaner and dressing the plastic/vinyl parts to restore shine. The process is followed by blow drying. Premium interior treatment is effective for heavily soiled interiors with foam based application to penetrate into car upholstery.

- Treats interior fabric, leather & vinyl of cars from stubborn stains, germs, dirt etc.
- Suitable for all plastic, cloth, leather and vinyl surfaces
- Prolongs the life and gives a rich new look to the interior of a car

BACTAKLENE ANTIMICROBIAL INTERIOR TREATMENT

Special cleansing of the car's interiors involves cleaning the upholstery for a germ free interiors using Bardahl Bactaklene. Treatment covers roof, mats, carpet, etc along with cleaning and dressing of plastic/vinyl parts.

- Germ free cleaning of the car's interior from stubborn stains, germs, dirt, etc.
- Suitable for all plastic, cloth, leather & vinyl surfaces.
- Gives a rich, fresh and new look to the interior of the car
- Transforms the car interiors into a healthy space to stay

ENGINE DRESSING

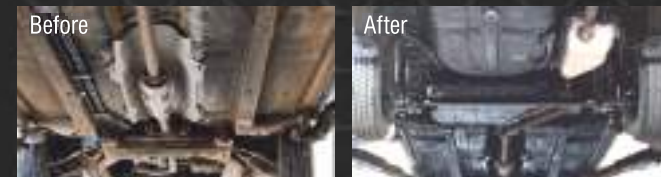

Engine Dressing treatment is applied on engine exterior to clean & degrease the engine compartment.

- Removes oil, grease, other dirt thoroughly and quickly
- Silicone free formula with neutral pH value
- Not aggressive to sensitive surfaces like Aluminum, Tin, Plastic etc.
- Gives the engine attractive new look

ANTIRUST UNDERBODY TREATMENT

Anti Rust Treatment is a unique anti-rust protection system. The product can be easily applied on the underbody of automobiles. Anti Rust Coat system makes a corrosion resistant protection film on sheet metal that protects the car from rust and abrasives. High pressure automatic spray gun is used to apply and reach every section that is seen and unseen to the naked eyes. The treatment covers under chassis & wheel arches.

- Protects car underbody panels against stones, gravel, pollutants, etc.
- Prevents rust and corrosion of underbody parts
- Deadens droning noise and insulates against heat and cold
- Faster drying

SILENCER COATING

Automotive silencer and exhaust system passes through rough conditions effecting it with damages due to stone chips, moisture & dirty water, road grime etc. This can cause rusted silencers. Silencer Coating is a heat resistant anti corrosive coating for exhaust system and galvanic surfaces.

- Silencer coating is a high quality product for silencers
- Designed for resisting heat and providing a superior coating
- Protects against rust & corrosion and gives a shiny look

HEADLAMP RESTORATION

Over time, headlights become oxidized rendering them hazy & yellow. Hazy headlights shine less brightly which is dangerous for the drivers & others on the road.

- Headlight restoration process cleans light oxidation, deep stains and removes scratches & minor imperfections.
- Headlight Pro Sealant restores the headlights of staining, yellowing & hazing.
- Headlight restoration process leaves the headlights with a sparkling new look for ultimate visibility.

EMBLEM CLEANING

Emblem Cleaning removes even the toughest hard water stains, limescale deposit, soap scum, water mark, white stains from vehicle logo & chrome surfaces. Emblem Cleaning & polishing process protects the surface & gives a sparkling shine finish.

- Suitable for vehicle logo & chrome surfaces
- Removes hard water stains, rust, tarnish & oxidation
- Gives a sparkling shine surface

WINDSHIELD CLEANING AND PROTECTION

Windshield Cleaning & Polishing treatment eliminates the windshield of minor swirls, stains, dirt, foggy surfaces. The treatment repels water, dirt, dust and helps in removal of swirl marks .

- Superior process to provide you with a new looking windshield
- Gives a clear and sparkling shine to the windshield
- Gives a clear vision while driving and makes night driving comfortable
- Savings in replacement costs of the windshield
- Water repellent properties and allow insects to be easily washed away

ALLOY WHEEL POLISH & PROTECTANT

Alloy Wheels are constantly subject to road conditions & environments. Dirty water, dust particles etc., spoil the shine and gives a dirty look to the alloy wheels thereby spoiling the overall look of the car.

- Alloy wheels are cleaned with special de-greasers to clean them from tar, hard dirt and dust.
- Post cleaning, Alloy Wheel Polish is applied to restore the original shine to make it look as good as new.

AIRCONDITION DISINFECTANT TREATMENT

Air conditioning Systems are cold & wet which makes breeding grounds for bacteria, fungi & molds. If the AC in your car is giving a foul smell it may be inundated with bacteria. A hygienic environment is necessary for a healthy passenger car cabin. The AC cooling efficiency also comes down due to the accumulation of dirt.

- Eliminates pollutants like dust, fungus & bacteria, nicotine
- Eliminates bad smells and avoids the proliferation of micro-organisms and mildew.
- Ensures healthy passenger car cabin

AC EVAPORATOR CLEANING

The AC evaporator becomes wet as humid air is passed over its cool surface causing bacteria to grow. In addition, trapped contaminants insulate the evaporator, reducing heat-transfer efficiency as well as airflow. Bardahl specialty solvents Eva Klene & Eva Flush are specially formulated to clean and flush the AC evaporator system. The solvents are sprayed on the evaporator using a visual borescope spray gun integrated cleaning device.

- Removes impurities, kills germs and improves interior air quality
- Can visually check the evaporator before and after cleaning
- Mechanically flushes evaporator with specialized cleaning equipment to remove harmful elements from AC system
- Increases cooling efficiency and AC performance
- Reduces bad odour in the car
- No need to dismantle or take out the evaporator
